The High-End InfoTelesys iT Set V21

If you like the iPad size and form factor, the iT Set V21 will delight you with its 1.6GHz dual-core Central Processing Unit (CPU) and quad-core Graphics Processing unit (GPU), that's 60% faster than an iPad 3. The 8,000 mAh battery is more than twice the capacity of an iPad. This is one of the highest end tablets on the market.

Two cameras, a two Mega Pixel one on the front and a five Mega Pixel one on the back make capturing moments or video conferencing a breeze. With the SD slot you are not limited on how much video or data you capture, simply pop in another SD chip or USB flash drive. You can also attach disk drives and a keyboard and mouse to the USB port and turn this system into a high-end multimedia workstation.

iT's really not an apples to apples comparison between the InfoTelesys iT Set V21 and the iPad; the iT Set's got iT all and way more. As with all the InfoTelesys iT Set Family, the iT Set V21 is fully equipped with on-board micro-SD expansion slot, high-speed USB ports and HDMI ports and WiFi at no extra cost or hassle. With InfoTelesys you are also not locked into wireless providers Apple cuts deals with; make your own choice and use low-cost supported USB modems if you don't have WiFi. Your iT Set's on-board HDMI port projects your best image at 1080p HD, delivering real results with powerful performance.

iT's all here, all inclusive, no need for clumsy expensive adapters, with InfoTelesys you've got iT all. Enjoy this exciting new high-performance ride with InfoTelesys.
