

INFOTELESYS
iT Set V23

The InfoTelesys iT Set V23 & iT Phone

If you like the iPad size and form factor, the iT Set V23 delivers the same size system without limitations. You Get iT all with the iT Set. Integrated 3G and full cell-phone functionality (except you need to speak big when talking on an iT Set V23, although you can discretely utilize the integrated Bluetooth 4.0 with any standard Bluetooth earpiece)

The same snappy performance customers experience with the popular iT Set V18 are now integrated in this larger model. iT's really not an apples to apples comparison between the InfoTelesys iT Set V23 and the iPad; the iT Set's got iT all and way more. As with all the InfoTelesys iT Set Family, the iT Set V23 is fully equipped with on-board micro-SD expansion slot, high-speed USB port and HDMI port and WiFi at no extra cost or hassle. With InfoTelesys you are not locked into wireless providers Apple cuts deals with; make your own choice. Your iT Set's on-board HDMI port projects your best image at 1080p HD, delivering real results with powerful performance.

With the ultra-high-definition Mali 400 GPU and 1.2GHz Allwinner A10 ARM Cortex A8 CPU, this baby delivers smooth High-Definition video on the screen and on any HDMI big-screen or projector (you can use an HDMI to VGA converter for old projectors). The 5,600 mAh battery is nearly double the capacity of an iPad.

Two two Mega Pixel cameras on the back and front make capturing moments or video conferencing a breeze. With the SD slot you are not limited on how much video or data you capture, simply pop in another SD chip or USB flash drive. You can even attached disk drives and a keyboard and mouse to the USB port and turn this system into a high-end multimedia workstation.

iT's all here, all inclusive, no need for clumsy expensive adapters, with InfoTelesys you've got iT all. Enjoy this exciting new fully integrated ride with InfoTelesys.
